Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	Farmer, Agricultural Researcher, Policymaker who provides input and receives recommendations.
Rectangle with numbered header	Process	Performs operations such as validating input, preprocessing data, predicting suitable crops, and generating recommendations.
Rectangle (solid fill, no number)	Data Store	Stores crop dataset, trained machine learning model, environmental data, and recommendation history.
Labeled arrow	Data Flow	Represents movement of soil, weather, crop, and recommendation data between entities, processes, and data stores.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
